

Still work w/ this

- (exposure modes
- * (focus modes

Spot 3-8%
 Center weighted 12-35%
 Matrix or Multi-zone

center weighted
 spot - is most precise

Multi-zone

makes towards you and away from you

Equivalency $\frac{5.6}{1/25}$
 depth of field
 - Range of motion

On Sigga syllabus there is a depth of field calculator

$\frac{1.4}{1/1000}$ $\frac{4}{1/250}$ ← $\frac{5.6}{1/25}$ → $\frac{8}{1/100}$ **11** $\frac{1}{30}$

experiment:

Shoot along wall
Table top

* There are examples on basearts.com
